# BIT VALLEY

## INTRODUCTION

### WHAT IS BITVALLEY ?

The Bitvalley idea is to be the biggest ecosystem in Crypto. What does that mean? It means that we will develop a lot of products but all the products will use the same token which is BitV. By investing in Bitvalley you invest in all of these projects. How will we start to build this ecosystem? Well, we already have. Long story short, BitFans will be our Adult platform, Crypto World will be our Crypto Platform.

### BITVALLEY'S FIRST PRODUCT

#### Bitbae

Every Product that we have will have their own Website, Roadmap and Whitepaper, so investors can track the progress of each product. We value our investors a lot, that's why we decided to include all the products in a single project. We have our first product already developed which is BitFans, also our second platform Crypto World is already in progress and it will have multiple products inside.

### HOW WILL IT BENEFIT OUR TOKEN ?

As mentioned, before we will have multiple utilities for 1 token. We will benefit our token in multiple ways

1. From every withdrawal on our platform we will get 12% tax and that tax will be divided like this, 6% Team and platform cost, 4% Royalties, 2% Buyback and Burn BitV tokens.
2. From every service that our team will do (Vetting, Development, Marketing across our platforms )30% will be used to buyback and burn BitV tokens.
3. Implementing BitV as native token across all our platforms

### OUR PRODUCTS

#### Bitbae

(Already developed)

#### CryptoWorld

(Development in Progress)

You will be able to find info about each product by visiting their websites. (Note: Websites, Whitepapers and Roadmaps will be available for each product after we start developing the product)

# CRYPTO WORLD MOBILE APP

---

Crypto World will be our All-in-One Crypto Related Mobile App which will also have its Web based Platform. Crypto World will have multiple products inside one Mobile App.

## CryptoWorld the app for beginners

It is a real struggle for real when you first start with crypto. All you know is Coin Market Cap, you look for a project with a lot of zeros and hope it will reach Bitcoin price, and you become a trillionaire. Well, it doesn't work like that. But most of the time, new investors, start with small amount of money, if they want to become very rich from that small investment, they need to find high risk high rewards projects, but if they are educated correctly those projects are not that risky anymore, profitable yes. That's why Crypto World will be the best app for beginners, it will have courses for them, so they know how to invest, how to spot a scam etc. Content creators will create content for crypto beginners, but also for old investors (there is always something new to learn in crypto).

---

**So, what will Crypto World do is,** make it easier for investors to find project, but also educate them how to scan them, so they don't get rugged or scammed, or at least reduce the probability of you getting scammed.

We want to be that app, so when someone asks you "Hey i want to invest in crypto, but i don't know how to start", you will say "Just download CryptoWorld, you can learn in there everything and also find projects to invest."

## Something that we mentioned before, new investors know

only about Coin Market Cap, and they don't really know that most of those projects have started months ago before getting listed in there. Old investors have found their sources of how to find new projects during a long period of being in crypto, new investors struggle with that. You don't just open Telegram, type a random word and expect to find a Telegram group where new projects are shilled. Lately also old investors struggle to find newly launched projects. Crypto world will fix this in the best way possible. When we reach a certain number of downloads, a lot of project owners would like to promote their projects on our App. There will be Ads, there will be list of upcoming projects, there will be Amas hosted in our App, there will be subscription groups, there will be an Open chat and many many more ways of finding new projects.

---

# CRYPTO SERVICES

CRYPTOWORLD will be a Mobile App, and all the crypto related products that we will develop will be in the Application. We all have been through all the struggles when we decided to join Crypto. Why? Because we didn't even know what to search for, limited information and we were very uneducated. We want CRYPTOWORLD to be the app that every new investor should use, but also old investors will profit a lot by using it.

We will share detailed information about every product that we develop when the development of that product is on a certain level, we don't want to give free ideas to anyone.

The second product in our Ecosystem will be Crypto Services. What is Crypto Services? Crypto Services will be a product inside our CRYPTOWORLD Mobile application, it will also have it's separated Webapplication. In Crypto Services there will be Service Providers, and users. As a service provider you can list your services (ex. Web Designer, Logo designer), and users can hire you by paying you in Crypto. The best thing on this platform is that no one can scam you when

## Our Payment method

We have designed a payment algorithm that works like this:

Users buy credits using BUSD, service providers set their prices on credits and when you purchase a service on our platform you pay the service provider in credits.

There will be generated a contract between the user and the service provider. The contract will hold info about both of them, like their wallets, services on which they have agreed, deadline. The user buys credits, sends them to the service provider, the service provider will get those credits after he delivers the work.

If the service provider doesn't deliver the work, the user can report him and get refunded. If the work is delivered on time, the user confirms it, and the credits are transferred to the service provider.

”

**Success seems  
to be connected  
with effort.**

## **OPEN CHAT**

---

Open chat, will be a chat inside our application, where everyone can chat with everyone. This will bring all the crypto enthusiasts in one place, this chat might get over crowded, but that's the idea. There will also be separated groups for different things.

## **OTHER PRODUCTS**

---

1. Crypto Services (Development in Progress)
2. Open Chat (Development in Progress)
3. Ama host
4. Crypto Listings
5. Giveaways
6. Crypto TikTok

**Information about the other products will be shared when we start developing them.**

# BITBAE

---

Bitbae is a fully developed crypto friendly adult PWA web application which is considered user friendly and easy to use thanks to our simplistic, modern and yet elegant design.

## How to use Bitbae

How to use our app

First you have to register, create an account and when you're done registering simply connect your Metamask or Trustwallet with our app and you're all set and you can have fun and spend time with our beautiful models.

Bitbae uses credits so you can buy credits using BUSD and you can use them however you like on. As far as security on the payment part goes you are 100% secure when connecting your wallet or making any transactions as we do not collect any data whatsoever. Our app offers the users many features which include direct messaging the models, tipping, live cam to cam video chatting. Also the models can setup their private section in their profile in which they can post their exclusive content which the users can contribute to a weekly fee and gain access to the models exclusive content.

## These are some of our features that we have on our platform

Chat with a model , pay per view ( pictures and videos) , subscribe for exclusive private content to your favorite models , Video chat ( one on one video call ) , subscribe to special groups consisted by 3/5 girls that share daily hot content on those groups , instant withdrawals .

Every model that is registered on our platform is setting up her own prices for every service , we dont set the prices for their services.

## You can live videochat with the models one on one

the price is determined by the model, and while chatting if you want something extra at the moment you can simply press the tip button and the funds will be immediately transferred to the model so you can continue the fun uninterrupted without having to leave the videocall.

There are also groups with 5+ models in which the models will post daily content like exclusive photos and videos. Also all the members of the group, the models and the users can interact with each other via messages, you can join these groups by contributing to a weekly membership. All the models have their own ways and plans on how and what they provide so they have their price list and the offerings on their profile. And if you run into a conflict with one of the models provided for example you pay them and they don't deliver or anything for that matter we have given the users an option to report. If a user reports a conflict the funds sent to the model will be withheld until we resolve the issue if for example the user has paid a model

# CRYPTO COURSES

---

## WHAT IS CRYPTO COURSES ?

**Crypto Courses** is a platform that allows providers to build online courses on their preferred topics which will be mostly based around the crypto space. The providers, they can upload videos, PowerPoint presentations, PDFs, audio, ZIP files and live classes to create courses. Providers can also engage and interact with users via online video chatting or just simply messaging if the users have any questions.

---

## WHAT KIND OF COURSES WILL THERE BE ?

**Courses are offered** across a breadth of categories, including business and entrepreneurship, academics, and technology but the majority will be based around the crypto space.

The courses on Crypto courses can be paid or free, depending on the provider. So anyone new to the crypto space can just go on Crypto courses and get educated, what is crypto, how does it work, how to buy, crypto wallets etc. Basically everything there is to know about crypto

# OUR TEAM

---

## OUR TEAM

---

We are based on Europe.  
We are very familiar with crypto space , we have 4 years of experience on blockchains.  
We know what it takes to make a crypto project successful, so bear with us and enjoy how a real project feels like.

### So lets talk about our team

Our core team is consisted by 7 people, we are well cooperated team that have worked together for many years, these are our positions on the team.

### Team Positions:

---

- 1 solidity developer
- 2 designers
- 2 Python, angular, nodejs, rubi developers
- 1data management
- 1 marketing leader

# BIT VALLEY

## ROADMAP

### 2021

Q2

Birth of BitValley idea  
Gathering a Team  
Brainstorming  
Forming the whole concept

Q3

Starting to develop our first Product BitFans App  
Starting to develop the Smart Contract  
Brainstorming for future updates  
Testing our Smart Contract

Q4

Writing the whitepaper, designing the website  
Starting to get the word out  
First Community AMA  
Private Sale  
Audit of the smart contract  
Giving Voting power to our Private Sale Investors  
Deciding about the future of Bitvalley with the PrivateSale investors  
Expand the team  
Start developing Multiple products simultaneously

### 2022

Q1

Heavy marketing before Presale  
Releasing our 1st Product ( Bitplay )  
Presale  
Launch  
CMC / CG Listing  
Waiting for the right moment to release our Second Product in our Ecosystem

Q2

Continue adding products to our Ecosystem  
Creating partnerships  
Implementing Fiat payments on our platform  
Make our Products Multichain  
Our Ecosystem reaches its full Potential

Q3

Market our second product  
Launch our BitValley official Android and IOS app  
Expand our team  
Reaching a Solid number of downloads  
Implementing our native token BV as a payment method on our platform  
Waiting for the right moment to release our Third and Fourth Product in our Ecosystem  
Market our Ecosystem

# LAUNCH STAGES

## STAGE 1

Our first phase of the launch will be Private Sale . Only 100 people will be able to participate into private sale . Contribution rate for private sale will be fixed 2 BNB per wallet . Private sale investors will have benefits from the token and from the platform . Private sale percentage from the total supply will be 24% .

## STAGE 2

Our second phase of the launch will be Presale . The presale will be held on pinksale . Presale will begin with whitelist , whitelisters will have 15 minutes advantage to buy on the presale . Minimum buy for presale will be 0.1BNB , maximum buy will be 1BNB . Softcap for presale is planned to be 200BNB and hardcap is planned to be 400BNB.

## STAGE 3

Pancakeswap listing will be our third and final stage of the launch . The slippage that you will need to use to buy will be 11% (read more about our taxes on our whitepaper) .Everyone that was hesitant to buy on private sale or presale don't lose you chance to buy on the launch and enjoy what a real project feels like when you invest early.

# TOKEN METRICS

---

**TOTAL SUPPLY: 10.000.000.000 BitV**

---

## ALLOCATION

Private Sale / 24% - 2.400.000.000BitV

Presale / 44% - 4.400.000.000BitV

Liquidity / 23.52% - 2.352.000.000BitV

Pinksale Fee / 0.88% - 88.000.000BitV

Team&Marketing / 7.6% -760.000.000BitV

(ALL TOKENS WILL BE VESTED)

---

## RATES

Private Sale / 1BNB = 12.000.000

(2BNB = 24.000.000 BitV)

Presale / 1BNB = 11.000.000 BitV

Listing / 1BNB = 10.000.000 BitV

# OUR MISSION

---

**We think big**, take smart risks, and do things that have never been done before. We are not afraid to make tough choices that align with our long-term objectives . We know that it always seems

## OWNERSHIP AND BE DECISIVE

---

We are all empowered to take initiative, make the right decisions, and act as owners. We are committed to protecting our company culture and seek to bring in the best people we've ever worked with. We aim to surprise and inspire with the quality and speed of our decision-making.

## STAY DETERMINED

---

We never give up, carry each other through hard times, and recognise grit in our colleagues.

We understand that building a world-changing company is a monumental task, but we love every minute of it .

We will celebrate milestones together, recharge, and get back to work.

Our mission is clear , number one company in the crypto space .

We don't seek the limelight and focus on doing what is best for the company and the users . We leave our egos at the door and learn from our mistakes, knowing that we are always stronger as a team. We think twice before spending, but we are aggressive when it comes to investing in what matters.

As you can see our mission is clear , transparency , honesty , hardwork and success .

# CONCLUSION

## DETERMINED TO SUCCEED

---

As you can see we are determined to succeed , there is only one path on our sight and thats success .

We are highly motivated , we have the neccesary experience , we have an amazing and skillfull team .

We will never stop working , this is our lifetime project .

We are glad to have you onboard with us and lets grind together our path to success .

**Much love and respect from BitValley Team**

---
